Clinician review · Q3 2026 (July to September) · three ways to count (the review uses Appointment Provider)

eCW records three providers on a visit and its claim: Resource Provider (the schedule the visit was booked on), Appointment Provider (who it was booked with) and Rendering Provider (who the claim is billed under). The same clinician, counted each way:

	Resource Provider	Appointment Provider (in use)	Rendering Provider
Visits seen (booked with them, incl. rooms)	1,568	1,855	1,820
Patients seen	1,456	1,694	n/a
New patients	268	268	n/a
Billed	\$494,202	\$522,303	\$522,303
Drugs billed	\$0	\$670	\$670
Income	\$254,189	\$269,188	\$269,188
Allowed	\$237,763	\$251,719	\$251,719
Billed per visit (booked with them, incl. rooms)	\$315	\$282	\$287
Billed per patient	\$339	\$308	n/a
Income per patient	\$175	\$159	n/a

Rendering Provider is recorded on claims, not visits: n/a on the patient rows. Its visits are billed visits (a patient's service day with a charge).

Appointment Provider: visits seen are every visit booked with them, 288 of them on a room or machine schedule (the table's On rooms); Resource Provider counts the visits on their own schedule.
